Renewable energy comes from unlimited, naturally replenished resources, such as the sun, tides, and wind. Renewable energy can be used for electricity generation, space and water heating and cooling, and transportation. Non-renewable energy, in contrast, comes from finite sources, such as coal, natural gas, and oil.

Often ranking among the top jobs in the U.S., landmen are public-facing representatives of energy companies. 2 These energy industry professionals are responsible for negotiating with landowners for the rights to operate on their land. Conventionally, this meant securing extraction rights for materials such as petroleum, natural gas or coal.
