

Renewable Energy Performance Platform (REPP) supports the growth of sub-Saharan Africa's renewable energy industry by mobilizing private investment in renewable energy. Supported by the EIB and UNEP, the REPP programme supports renewable energy projects in sub-Saharan Africa with early financing, i.e. development cost support, and early debt or equity capital.

This document outlines the gender action plan for project FP222: Renewable Energy Performance Platform (REPP 2). Gender action plans seek to operationalise the constraints and opportunities for women and men identified during the gender analysis towards fully integrating them into the project design.

This document presents relevant environmental and social safeguards (ESS) information about FP222: Renewable Energy Performance Platform (REPP) 2. Project and programme funding proposals that have environmental or social impacts are required to provide these reports as annexes to the funding proposals.
