We are one of few law firms in the UK with a practice of dedicated clean energy, waste & sustainability solicitors. Our clients include energy project developers, equity and debt investors, contractors, large energy consumers, utilities and other energy suppliers, local government, landlords and occupiers, energy services companies (ESCOs) and aggregators.

As global energy consumption continues to grow, so does the need for sustainable, secure and affordable energy and natural resources. At Penningtons Manches Cooper, our experienced energy lawyers are expertly placed to advise on the opportunities and challenges arising from transformations occurring across all segments of the energy and natural resources sector.

Renewable energy comes from unlimited, naturally replenished resources, such as the sun, tides, and wind. Renewable energy can be used for electricity generation, space and water heating and cooling, and transportation. Non-renewable energy, in contrast, comes from finite sources, such as coal, natural gas, and oil.

Renewable Energy Projects. Ireland has ambitious plans in place to become a world leader in renewable energy. According to the Department of Communications, Climate Action & Environment, under the 2009 Renewable Energy Directive, the goal is for 40% of electricity consumed in Ireland to be from renewable sources by 2020; one of the most demanding such ...

Authorizes local municipalities and political subdivisions to have final say on if a renewable energy power plant can be sited in such municipalities" or political subdivisions" jurisdiction; establishes conflict of interest standards for approving the siting of a renewable energy power plant in a local municipality or political
