

The wind generator is a central component of the FloatLab research project, which aims to simulate extreme offshore conditions and support the validation of engineering models used in ...

The installation of the first 220-metre,recyclable wind turbine in Jilin, China, is a major step towards circular economy in the wind industry.The wind turbine can be recycled thanks to the ...

A new approach to a 100-year-old math problem is reshaping how engineers understand wind turbines. Penn State engineering student Divya Tyagi developed a cleaner and more complete solution to a classic aerodynamic challenge. Her ...

The aim of National Institute of Wind Energy under its WRA division is to locate wind rich sites in the country through data analysis for the development of wind energy utilization. The data generated thus from all parts ...

New bladeless wind turbine generates clean, quiet, bird-safe power New bladeless wind turbine uses vibration instead of blades, offering quieter, safer, and greener energy for homes and cities.

The wind industry continues to push boundaries this week, with strategic hires, global milestones, and new technology deployments shaping the global renewable energy landscape. RWE ...

Comprehensive 2025 handbook: site & wind evaluation, turbine sizing formulas, certified models list, grid/off-grid economics, incentives, interconnection, insurance and maintenance FAQs

The Division provides various services for the healthy and orderly growth of Wind Energy Sector such as: Standardization works in Wind Energy Sector, Facilitation for Grid Synchronization of Prototype of wind turbines and ...
