How many homes have solar panels in the UK?

Here's how many homes have solar panels in the UK, which areas have the most, and how the UK compares with Europe. More than 1.4 million households in the UK have solar panels, according to the latest government data. That means 5% of the UK's 28.4 million households have gone solar.

How many homes in North East England have solar panels?

There are savings to be gained beyond the south and central regions of the UK, as shown by the fact that 4.83% of homes in North East England have solar panels - which is above the national average. We've also broken down the number of solar homes by county.

Do solar panels invalidate NHBC?

Installing solar panels on new builds in the UK doesn't automatically invalidate the National House Building Council (NHBC) warranty, provided the installation is carried out by a fully certified installer and doesn't compromise the structural integrity of the building.

Should solar panels be included in new buildings by 2025?

And a YouGov poll of 107 MPs in January 2024 revealed that 79% of them advocate for the inclusion of solar panels in all new constructions by 2025, signalling a push for further environmentally-friendly building regulations. In March 2024, the European Parliament approved a law requiring solar panels on all new residential buildings by 2030.

When were solar panels first installed in the UK?

The first household to get solar panels in the UK was the Oxford Ecohome, which made the leap in 1995, but take-up over the next 15 years was glacial. The government started recording installation numbers in 2010, when just 23,757 households went solar - but the subsequent years have seen an explosion in solar demand across the UK.

Will solar panels affect my ability to move house?

It is important to consider how the solar panels might affect your ability to move house in the future. They could be a help or hinderance, depending on a number of factors.
