Rezolv Energy power producer said it has selected three companies - CMC Europe, Solarpro and Green Solar Energy - to build a 229-megawatt (MW) solar park in northeastern Bulgaria.

Rezolv Energy was launched last year by Actis, a leading global investor in sustainable infrastructure. Rezolv already has more than 2GW of clean energy being prepared for construction in Romania, including the 1,044 MW Dama Solar project, which will become the largest solar plant in Europe once it is operational.

QNB Metals and RéSolve Energy join forces to explore and produce white hydrogen from geological sources, aiming to develop a new clean energy source and drive innovation in Ontario and Québec. For over 25 years, FCW has been the go-to source for news, information, and analysis.

Rezolv Energy obtained regulatory clearance for a 229 MW solar power project, which would be the largest in Bulgaria at the moment. In addition, the company's minority partner in an investment in Romania bought the land for their photovoltaic plant under construction, planned to reach a stunning 1.06 GW.

The project location is secured, situated on a large flat site, benefitting from good solar irradiation and energy yield. The power plant is in a final development stage with confirmed capacity for grid access close to the site and is currently being prepared for construction.
