To avoid overheating ambient air temperature must be considered when choosing the inverter installation location.

What is a three phase inverter?

Appendices Solis Three phase Inverters convert DC power from the photovoltaic(PV) array into alternating current(AC) power that can satisfy local loads as well as feed the power distribution grid. The inverter ships with all accessories in one carton.

What is a GCI single phase hybrid series inverter?

A GCI single phase hybrid series inverter is a type of inverter used for both PV (Photovoltaic) and wind systems. It features two different Maximum Power Point Trackers (MPPT), one for the PV input and the other for the wind input (from the controller). The inverter can transfer DC power from the PV panels and wind turbine into AC power and feed it into the grid.
