

Sharp solar inverter jh1600e d-21

Why does my sharp jh1600 have a D-21 error?

Not Good. Have you just walked past your Sharp JH1600 solar inverter and been greeted with a d-21 fault on the screen? Unfortunately the d-21 error is a major internal fault with the inverter and the official response from Sharp to this code is: "the d-21 fault is caused by excessive voltage transients on the input or output of the inverter.

What if my sharp jh1600 inverter is stuck on a D21 fault?

If your Sharp JH1600 inverter is stuck on a D21 fault the best thing to do is replace the faulty inverter with a quality 1.5kW solar power inverter. We recommend the Fronius Galvo 1.5 as a nearly bulletproof replacement unit with a long 10 year parts warranty that is perfectly sized to replace the Sharp JH1600.

What causes a D-21 error on a sharp inverter?

Unfortunately the d-21 error is a major internal fault with the inverter and the official response from Sharp to this code is: "the d-21 fault is caused by excessive voltage transients on the input or output of the inverter. It is highly likely that an external factor such as Lightning or Power surge on the Grid is the root cause of this issue.

How many sharp jh-1600e manuals are there?

Manuals and User Guides for Sharp JH-1600E. We have 2 Sharp JH-1600E manuals available for free PDF download: Service Manual, Installation & Operation Manual

Does sharp's warranty cover a D-21 inverter?

If it is clear that your inverter is suffering from a d-21 fault, it will not be covered by Sharp's warranty. Extraneous events like lightning strikes and power surges are rarely covered under warranty. However, you may be able to make a claim on your home insurance policy. You will need to check directly with your insurer.

How do you wire a jh-1600e inverter?

Specification section on page 23.) Recommended AC circuit breaker: For JH-1600E: 10 Amps / 250 V To wire the main utility service panel to inverter: (1) Connect the ground wire (green and yellow) from the ground terminal in the main utility service panel to GND () terminal in the inverter.

I'd be more worried about the quality of the panels myself than the inverter. I think most of sharps panels are made in Japan. Personally, I'd prefer a Japanese made panel over a Chinese made panel any day of the week (well for the roughly the same amount of coin anyway) Sharp have also been in the solar game a long long time:
