To help you get started, we've rounded up a batch of the best smart home devices. Whether you want clever bulbs to light up your living room or a connected camera to keep an eye on your kids, the gear below will help you get a brainier abode.

Back in 2015, the average home used 10% of energy on lighting, but the most recent data from the EIA shows it has gone down to only 4%. According to the government agency, this is due to nearly half of all households switching to LED (light-emitting diode) bulbs from 2015-2020.. Finally, all the other electronics in your home, like televisions, computers, ...

Side by side with the trends comes the hype. Then, the myths start to appear. It was like that with the internet, smartphones and now with the smart home concept. Wherever you go, everybody seems to have something to say about techy houses and how integrated, futuristic and automated they are.

Whether it's a smart light bulb, a smart thermostat or a water-saving, low-flow smart sprinkler, there are plenty of devices on the market that can help you save money on energy, water and ...
