

Solar and battery package

What is included in a solar package?

Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home. SunWatts can help you find and install the perfect solar kit for your home.

Are solar batteries expensive?

Solar batteries are expensive and are not a one-size-fits-all product. The battery size you need for your home is determined by your energy usage. If you use more energy, you may need two solar batteries to power your home, which increases the cost.

Are solar batteries a required part of a solar system?

Solar batteries are not a required part of a solar system but can be worth it during power outages and for those with TOU energy plans. You can save money by using stored energy during peak hours when electricity rates are the most expensive. If you're not home for most of the day, you likely will not use all the solar energy your system produces.

What does a complete solar kit include?

Our complete solar kits offer all-inclusive packages (solar panels, inverters, charge controllers, and batteries), providing everything you need to generate clean and renewable energy for your home, RV, or off-grid adventures.

What is solar battery storage?

Battery storage systems are one of the latest technologies revolutionizing the clean energy transition. Solar batteries can reduce your reliance on the electricity grid by storing surplus energy generated from solar panels to use when the sun is less available.

Can I get a new solar & battery storage system for \$0 down?

Not only can you get a new Sunnova home solar & battery storage system for \$0 down, but if you own your system, you could also be eligible to claim up to 30% of your installed system's cost on your federal taxes. *Sound appealing? Talk with a home energy expert & get a quick quote today. There is no production guarantee in Florida.
