

The Solar Nigeria Programme, which was based on nurturing the strongest Nigerian start-ups in off-grid solar business with aid valued at \$66 m, has demonstrated that pay-as-you-go for solar equipment acquired at commercial rates works well for Nigerian households and small businesses, and triggers the off-grid solar market [32].

solar home systems, could save households and businesses over USD \$4.4 billion per year. The PAYG solar financing model has proven highly successful in delivering affordable electricity to low income, rural consumers at scale, yet this business model has yet to flourish in Nigeria, which has greatly hindered off-grid energy access.

This type of mounting system is widespread in Nigeria. The mounts are fixed to the roof, so sun rays hit them directly. On-roof solar mounts are affordable and allow optimal performance, as nothing covers the panel. A weatherproof seal is added during installation to protect the solar panel system from the weather.

Apart from NEP, the report acknowledged the Nigerian market for off-grid solar products is coordinated by the Rural Electrification Agency, which aggregates various programmes including the Renewable Energy Fund (which delivered 6,805 solar home systems as of 2020), the Nigeria Electrification Project and Power Africa.
