What is the best solar incentive in Idaho?

The best solar incentive in Idaho is the combination of the state tax rebate with the Federal Solar Investment Tax Credit. We will provide the details on these programs and some local incentives to help you see why the push to solar power is such a smart move.

Is it worth going solar in Idaho?

Idaho solar incentives make the switch to solar energy as good for homeowners as it is for the environment. Upfront costs for solar panels aren't nearly as prohibitive, thanks to generous tax credits and a low-interest financing program.

Are solar panels expensive in Idaho?

Solar panel systems in Idaho are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment. Here's how you can lower the cost of solar if you live in Idaho.

How much does a solar system cost in Idaho?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$14,280 in Idaho.

Does Idaho have a solar tax credit?

As a provision of the recently-passed Inflation Reduction Act, this 30% tax credit has been extended through the end of 2032. Idaho has a strong state-level program called the Residential Alternative Energy Tax Deduction. This allows payers to save up to 40% of the cost of their home's solar, wind, and geothermal power installations.

Are solar panels tax deductible in Idaho?

Instead of a more straightforward tax credit for installing solar, Idaho decided to enact a 100% tax deduction. So, when you go solar, you can take 40% of your installation cost as a deduction in the first year, up to a maximum of \$5,000. Then, for the next 3 years, you can deduct 20% of the cost each year from your state income for tax purposes.

Solar adoption in Idaho is ranked 27th nationally by the Solar Energy Industries Association (SEIA), and the state experiences an average of 197 sunny days per year. The cost of solar panel installation in Idaho has decreased in recent years, with the average price per watt at \$2.60 and the minimum system size at 10 kilowatts.

## Solar energy in idaho
