

The transition to renewable energy is a priority for both global and national energy policies. In Turkey, solar energy projects have gained significant momentum, driven by incentives, feed-in tariffs, and the abundant availability of solar ...

As at end-April 2025, renewable energy sources constitute a major portion of Turkey's total installed electricity generation capacity: hydroelectric power accounts for 27.2%, wind for ...

Together, the incentive exclusion and the newly introduced reference import price form part of a broader policy drive to localize production in Turkey's renewable energy sector. The approach ...

Turkey aims for 47% of its electricity to come from renewables by 2030, which is below the global share of 60% renewable electricity set out in the IEA Net Zero Emissions scenario. Ufuk Alparslan, Regional Lead at Ember ...

By technology, Solar Photovoltaic led with 99.4% of Turkey's solar energy market share in 2024 and is forecast to grow at a 21% CAGR through 2030. By end user, Utility installations held 64.3% share of the Turkey solar ...

Turkey Renewable Energy Market Size & Share Analysis - Growth Trends & Forecasts (2025 - 2030) The Turkey Renewable Energy Market Report is Segmented by Type (Hydropower, Solar PV, Wind, Geothermal, and ...

Turkey's solar capacity has achieved an impressive milestone, reaching 22.6 GW as of mid-2025. This remarkable growth, marked by a substantial increase in the first half of the year, is a ...

The global transition to renewable energy has accelerated interest in solar power plants (SPPs) due to their cost-effectiveness and environmental benefits. In Turkey, solar power has become ...

The environment watchdog has rejected a proposal by a controversial Turkish businessman to build a 50-megawatt solar power plant in Laikipia County, citing gaps in cost disclosure and ...

The Turkish journey towards decarbonisation reached a notable milestone in 2023 with the construction of a solar power plant by Kalyon in Karapinar (interior Anatolia). The facility, ...

As of April 2025, Turkey's total installed electricity generation capacity exceeds 118 GW. The country's three largest renewable energy sources-- hydroelectric (dam-based), solar, and ...

Solar energy policy turkey

In a move to accelerate its sustainability goals, Union Coop, one of the UAE's leading consumer cooperatives, has partnered with Positive Zero to roll out one of the Middle East's largest solar ...

A controversial solar power project linked to Harun Aydin, the Turkish businessman who was deported from Kenya in 2021 but maintains close ties to President William Ruto, is raising ...

Solar PV currently constitutes 51.3% of total national renewable power capacity. Credit: Audio und werbung via Shutterstock. Türkiye has one of the world's most rapidly expanding energy ...

Turkey is set to expand its solar energy capacity by an additional 3.4 GW by the end of March 2025. This is part of a broader energy strategy to increase the country's solar capacity from its ...
