

New Plymouth Factory Solar Installation Nexans New Zealand is spearheading the transition to use of 100% renewable energy for the New Plymouth plant by constructing a solar farm on the Bell Block site. The project ...

Sustainability and feasibility of solar-powered cooking stove technology, as a clean energy solution, for the low-income and rural communities in the Global South were discussed in this ...

Steady progress has continued throughout the quarter on key projects sponsored by EECA and WorkSafe New Zealand-Energy Safety, relating to New Zealand's transition to more renewable ...

Solar farms represent the single largest part of the pipeline, making up 44 percent of planned capacity or 20 gigawatts. If all the solar in the pipeline was built, it would triple New Zealand's ...

Scaling up of solar and wind power is essential for Aotearoa New Zealand to become carbon neutral by 2050. While wind and solar currently account for less than 8% of New Zealand's total energy generation, by 2050 ...

The perovskite solar cell market is experiencing explosive growth, projected to reach \$708.9 million in 2025 and exhibiting a remarkable Compound Annual Growth Rate (CAGR) of 40.6% ...

Key drivers include government incentives supporting renewable energy adoption, the decreasing cost of solar energy systems, and ongoing research and development efforts to improve ETM performance, durability, and cost ...

An Overview of New Zealand's Biogas Industry New Zealand's current biogas industry, while still in its formative stages, serves a vital role in the broader renewable energy landscape. As ...

A new suite of micro-credentials just launched by E-tec offers exciting pathways into solar installation for New Zealand's electrical workers. Designed for registered electricians, electrical ...

Geothermal energy's moment is here. Once constrained by niche geologic resources, the ability to produce ubiquitous, clean power and heat from the earth's crust is now on the horizon. Thanks ...

The Fraunhofer Institute for Solar Energy Systems ISE in Freiburg, Germany is the largest solar research institute in Europe. With a staff of about 1 400, we are committed to promoting a sustainable, economic, secure and ...
