

# Solar flexible bracket cost

Do flexible solar panels need mounting brackets?

Flexible solar panels' malleable design means you won't need heavy-duty mounting brackets to install them. Unlike roof-mounted panels, which require the services of a Microgeneration Certification Scheme (MCS)-certified solar panel installer to fit, you can install some flexible solar panels yourself.

What are solar panel mounting brackets?

Solar Panel Mounting Brackets by Fastensol are the backbone of sturdy and reliable solar installations. These brackets provide a secure and adaptable framework for attaching solar panels to various surfaces, be it rooftops or ground structures.

Why should I Choose fastensol solar panel mounting brackets?

How much do flexible solar panels cost?

Flexible solar panels generally cost between £60 and £150 for a 100W panel or around £1,000 to £1,500 for a solar array with a 1kW output, but there are plenty of factors that play into the final cost.

What are solar panels brackets & how do they work?

These brackets provide a secure and adaptable framework for attaching solar panels to various surfaces, be it rooftops or ground structures. With their durable construction and easy installation, they ensure optimal panel positioning, maximising energy production for sustainable power solutions.

Are flexible solar panels easy to install?

Easy installation: Flexible panels are easy to install. Because they are lightweight and moldable, they can be installed on different surfaces without needing heavy-duty mounting brackets. Flexible solar panels typically do not require drilling, and they can be installed on your own using industrial adhesives or VHB tape.
