

Solar panel broom

What is solar panel cleaning equipment?

Solar panel cleaning equipment refers to tools used to keep solar panels clean. Dirty solar panels tend to produce less energy than clean ones, so proper cleaning is necessary to maintain or increase their efficiency. Several types of solar panel cleaning equipment include brushes, sprayers, and extender poles.

How do solar panel cleaning tools work?

Generally speaking, solar panel cleaning tools consist of a long, telescoping (extendable and retractable) pole with a brush at one end and an easy-grip handle at the other. Some of these tools can be connected to a hose or outdoor faucet so that you can pump water through the pole and out at the brush end to enhance the tools' cleaning potential.

What is a solar panel cleaning brush and pole?

A solar panel cleaning brush and pole is a tool used to scrub away hardened bits of dirt or debris from a distance. It is a must-have for anyone with solar panels, especially those with rooftop panels. The brush features soft bristles that won't damage a solar panel's sensitive surface.

Which solar panel cleaning brush is best?
