

Solar panels installed on the roof to generate electricity

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Will my roof generate solar energy?

Realistically, your roof's solar generation potential will be less than that. It'll likely still exceed your typical household energy needs, but real-world constraints like roof space, sunlight exposure, and equipment specifications play a huge role in your panels' actual generation.

Why do people install solar panels on roofs?

Solar energy ensures eco-consciousness by being a clean energy source and economy by reducing electricity bills. Therefore, more and more people are installing solar panels on roofs and adapting to a cost-efficient, sustainable, and affordable life.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Do solar panels generate electricity on a south-facing roof?

Solar panels generate most electricity when they're on a south-facing roof that's sloped at 41° and isn't shaded. It's one of the first things our surveyors look at when checking your home's right for solar. A good surveyor can talk you through how the panels' position on your roof will affect their performance.

How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

each panel can generate approximately 425 kWh of electricity every year; Solar panel installation becomes more expensive with the number of solar panels you have installed. Keep in mind though; each solar panel you purchase is ...
