

Solar panels sacramento cost

Is Sacramento a good place to go solar?

Sacramento, California, is a great city for solar power. Not only does it have a lot of sunshine, but it also has environmentally conscious residents eager to make the switch. To help them do so, the city offers enticing solar incentives that make it easier and more affordable for folks to go solar.

Can I get a solar tax credit in Sacramento?

As long as your federal tax bill is high enough, you can take advantage of the federal tax credit in Sacramento, CA. This incentive allows you to apply 30% of your solar installation and equipment costs toward your federal tax bill. If the amount exceeds your tax bill, you can roll over the remaining credit to the following year.

How much do solar panels cost in Sacramento?

As of June 2024, the average solar panel system costs \$2.44/W including installation in Sacramento, CA. For a 5 kW installation, this comes out to about \$12,191 before incentives, though prices range from \$10,362 to \$14,020. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in Sacramento?

While a 5 kW system will only cost you \$12,191 in Sacramento, CA, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Sacramento, CA?

How much do solar panels cost in California?

The price tag for your home solar panel system will vary, but Californians can expect to pay somewhere between \$10,000-\$20,000. Your specific price tag will depend on the location of your home, the size of the solar panel system you need installed and available incentives, tax credits, and programs.
