

Solar photovoltaic panel installation full accessories

What does a self-install solar panel kit include?

Our self-install solar panel kits have everything you need to complete a roof-mounted solar panel installation on your house, garage, outbuilding or business premises. Each kit includes solar panels, a hybrid inverter, wiring, cables, mounting brackets and railings.

What does a DIY solar panel kit include?

Our DIY solar panels kits include all of the equipment and ancillary items you need to power your home for years to come with free energy while at the same time reducing, or completely removing, your dependency on over-priced, grid-produced electricity.

How do I choose a solar panel kit?

Check your daily energy requirements- If you're connected to the grid, check how much electricity you use per day so you can buy the correct size DIY solar panel kit. If you're off-grid, calculate how many appliances or tools you want to power and go from there.

Why should you choose DIY solar panel kits?

Our cost-effective DIY solar panel kits are designed for easy installation which makes them ideal for competent DIY-ers as well as those taking their first steps into world of renewable energy.

Where can I install solar panels?

You can install them on your home, business premises, outbuilding, garden office, shed, workshop or garage- and even shepherd's huts for those who run a luxury holiday let facility. As long as the roof is strong enough and large enough to fit the units, you can install solar panels on whatever type of property you want to supply energy to.

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?
