

# Solar photovoltaic panels placed at home

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How do solar photovoltaic panels work?

Solar photovoltaic panels transform free energy from the sun into electricity. This is then converted from a DC current to an AC current via an inverter, to make it suitable for household use. The panels capture energy from the sun and convert it into DC electricity via groups of photovoltaic (PV) cells.

What is a solar PV system?

power being generated by solar panels or be used in a home. Here are some quick definitions to help you. Solar photovoltaic (PV) systems are made up of several panels. Each panel has many cells made from layers of semi-conducting material, usually silicon.

Should you install solar panels at home?

Having solar panels installed at home sounds like an appealing idea. You get free electricity when the sun shines, potentially cutting your energy bills and doing your bit for the environment without having to give it much additional thought.

How do you install solar panels on a roof?

**Rail and Panel Installation** The cheapest and most practical way to install solar panels is with a combination of rails and brackets. A secure hook is fastened to the rafters underneath your roof tiles and the rails are attached to these exposed hooks across the length of the solar array.

How are solar panels installed?

We use a safe and strong installation method that uses friction to hold the rail and the edge of the solar panel securely in place. This system has been tested for heavy rain, hail and even hurricanes, so you know it's reliable. The panels are then laid on top of the rails, ready to be connected.

For homes in the Northern Hemisphere, a shade-free, south-facing roof with solar panels placed at a 30-degree angle is ideal for production. This is not to say that having a roof that is partially shaded, or east- or west ...
