

Solar power generation congratulates the founding of the party

Are UK politicians backing the expansion of solar energy?

U.K. politicians back the expansion of solar energy -- at least in theory. The Conservative government wants the U.K. to hit 70GW of solar power generation by 2035 (quadruple what is generated right now.) Labour backs the aim, and reckons they can decarbonize the whole electricity system even more quickly.

What are Labour's plans for solar panels?

Let's take a closer look at Labour's plans for solar panels and how it affects businesses. What is the Rooftop Revolution? The "rooftop revolution" is a plan from the Labour party to encourage millions more homes to be fitted with solar panels as well as see more solar farms created.

Will a 'huge national effort' 'treble solar power'?

The "huge national effort" will "treble solar power", with solar farms "growing rural communities, in the south east, south west and Midlands. This will require a different way of working - the biggest partnership between government, business and communities this country has ever seen," he added. "Clean energy is already cheaper than fossil fuels.

Will UK hit 70gw of solar power by 2035?

The Conservative government wants the U.K. to hit 70GW of solar power generation by 2035 (quadruple what is generated right now.) Labour backs the aim, and reckons they can decarbonize the whole electricity system even more quickly. The U.K.'s third party, the Liberal Democrats, want to plough cash into all renewables.

Will a national grid upgrade accelerate new energy generation projects?

Labour acknowledges that upgrading the national grid is crucial and promises to accelerate grid connections. Currently, aligning connection dates with project timelines is a major obstacle for new energy generation projects. Investors will welcome the commitment to "the largest upgrade to our national transmission infrastructure in a generation";

How does solar power work with agriculture?

British solar power and agriculture have gone hand in hand since the beginning of the UK solar industry, the organisations write. Farmers benefit from both rooftop installations and ground-mounted solar farm projects, says the letter, noting that the solar industry works closely with farmers and landowners on their solar projects.

PAGE Congratulates Founding Member EQT Corp.'s Net Zero Achievement Today, the Partnership to Address Global Emissions (PAGE) issued the following statement in response to EQT Corp. announcing that it has reached net zero ...
