How do I connect my off-grid solar to my house?

I use several ATs (automatic transfer switches) to connect my off-grid solar to the house. When the PV -> battery charges up enough to turn on the Inverter - the Inverter power flips the ATs from grid to inverter. When the batteries run down and the inverter goes off, the ATs automatically switch back to grid.

What should I know before building an off grid Solar System?

The most important thing to know, when getting ready to build an off grid solar system, is how much energy you need, as well as how your energy usage changes throughout the day and year.

What happens if a solar PV system is connected to the grid?

connection to the grid is made. The DNO will carry out a network study (which it may charge you for) to ensure that the local grid network can take the extra power that your solar PV system will generate. If the local grid network needs extra work before it can accept your connection, this will h
