

Solar system cotton fabric

What are solar fabrics?

Introducing Solar Fabrics! Harnessing the sun's power, these innovative threads woven with tiny solar panels revolutionize clothing. From charging devices on the move to providing built-in heat and powering portable electronics--even car seats!

How is solar fabric made?

It is made by incorporating photovoltaic cells into the fibers of the fabric, which can then be woven or knitted into a variety of different forms and shapes. Solar fabric is a flexible and lightweight alternative to traditional solar panels, which are typically made from glass or other rigid materials.

How do solar fabrics work?

Darker solar fabrics absorb heat providing greater view during the day. Solar fabrics ranging from white to black have openness ratings of 1, 3, 5, and 10%, which is the percentage of UV rays that pass through the fabric. Control your shades with just a simple click with motorized option.

What is solarcool fabric?

SolarCool fabric is a range of fabrics specially designed for windows blinds to provide solution in reducing heat, blocking ultraviolet rays and providing visual comfort. SolarCool Fabric reflects the heat transmitted through the windows and keep the room cooler which will in turn reduce energy cost.
