

Solar system unit plan

Grade 6 Science Unit Plan . Big Idea: The solar system is part of the Milky Way, which is one of billions of galaxies. Curricular Competencies: - Choose appropriate data to collect to answer their questions. - Identify patterns and connections in data. - Demonstrate an openness to new ideas and consideration of alternatives.

The Solar System. Our solar system is home to Earth and seven other planets. Each planet rotates on its own axis while revolving around the Sun. Every planet has unique characteristics and qualities that set it apart from the rest. The Sun keeps this complex arrangement in order. This unit reveals detailed facts about our Sun and the planets.

2. A Fold-up Model Solar System. With the Pocket Solar System lesson, students use a single strip of paper to make a simple model of the solar system to visualize how much space exists between the planets. They'll be practicing fractions as they fold their model solar system, too! Questions: After making the fold-up model and looking at the planets all stretched ...

Teach the solar system with Flocabulary's "Confession of a Planet"; Revolution, rotation, orbit--the terms could make your head spin, so this song will set you straight on the solar system. We start on planet Earth and explain how the Earth's rotation creates days and its revolution around the sun creates seasons.

The Outsiders Unit Plan includes everything you need to teach The Outsiders by S.E. Hinton. With more than 250 pages and slides of content, there will be absolutely no prep required. This novel unit includes eye-catching presentation slides, print-ready assignments, questions, vocabulary, quizzes, video journals, and interactive class activities.

Students will be able to provide a brief explanation of what the solar system is, and what it contains, with a specific focus on the importance of the sun. Students will learn the order and ...
