

Graphene batteries and lithium-ion batteries are two of the most talked-about technologies in the energy storage industry. Both have their own unique properties and advantages, but which one is better? In this article, I will ...

It will feature Li Auto's self-developed Silicon Carbide drive motor for the first time. Besides, the Li i8 will be equipped with an air suspension system. It will come standard with a 5C ternary ...

The demand for lithium-ion batteries is projected to grow significantly, driven by applications in EVs, BESS, and consumer electronics. The market is expected to expand from approximately ...

Tesla is reportedly embroiled in a legal battle with the California Department of Motor Vehicles (DMV) over allegations that the EV manufacturer has overstated the capabilities of its autopilot ...

IM Motors recently announced its self-developed "Super Range Extender" technology will be officially unveiled on August 1st. This innovative solution adopts a large-capacity battery ...

A team of Chinese researchers has made a groundbreaking breakthrough to revive aging lithium batteries by injecting a "shot" of lithium ions, potentially extending their lifespan from the typical 6-8 years or 1,000-1,500 ...

Kalmar has introduced its second-generation lithium-ion (Li-ion) battery solution for its range of electrically powered counter balanced equipment: reachstackers, empty container handlers ...

In a groundbreaking development poised to reshape the electric vehicle industry, scientists have unveiled an innovative lithium-ion battery technology that dramatically cuts charging times by ...

Kalmar has unveiled its second-generation lithium-ion (Li-ion) battery solution designed for its range of electrically powered counterbalanced equipment, including reachstackers, empty ...

Thus, growth in lead acid batteries is expected to enhance the market for the lead dioxide materials segment. Based on battery type, lithium-ion segment is expected to grow at the fastest rate during the forecast period. The ...

Scientists have created an anode-free sodium solid-state battery, bringing the reality of inexpensive, fast-charging, high-capacity batteries for electric vehicles and grid storage closer ...
