

Straight Man Finance Talks About Photovoltaic Panels

Should I pay for my solar panel system on Finance?

Paying for your solar panel system on finance lets you spread the costs by splitting it into manageable monthly payments. 0% APR means you'll pay no interest charges so all you're paying for is the solar panels and the cost of installation. See our finance examples below.

How do I finance a solar PV installation?

The most cost-effective way to finance the installation of solar PV panels is to pay in full using your own savings. If you're unable to pay upfront, you could consider a loan or remortgaging.

Why should you consider solar panel financing?

Exploring solar panel financing is key to enjoying the benefits of renewable energy without incurring the high initial costs of solar setup. Also, homes with solar panels are perceived as more valuable which could help if you decide to sell your home in the future.

Are solar panels a good investment?

A greener home is without doubt more attractive in more ways than one. According to research conducted by FirstPort in 2023, potential buyers are willing to pay an average of £2,038 more for a home with solar panels installed. What's more, the more time you spend in your home with solar panels before moving, the bigger the uplift in house value.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Can I finance my solar panels through glow green?
