What is a battery backup sump pump?

Sump pumps are devices that remove accumulated water from a basement. If the primary sump pump fails due to reasons such as power outages, a sump pump battery backup gets activated to ensure that the excess water still gets removed with speed and efficiency. The Wayne ESP25 Upgraded 12-Volt emerged as the top pick among battery backup sump pumps.

Does a sump pump need a backup if power goes out?

For those times when the power is out, it's a good idea to have a backup plan for removing water from the basement. The best battery backup for existing sump pumps cycles to remove water and how long a power outage typically lasts in your area. The following sump pump models will step up when the power goes out.

How does a water backup sump pump work?

When the primary sump pump stops - the water backup sump pump activates by using city water. They remain connected with the drainage system, and a separate drain is used to keep flooded water away from the main water supply. It is kept slightly elevated above the primary sump pump and requires at least a PSI of 40 to pump away gallons of water.

What is the best basement sump pump with battery backup?

Wayne BGSP50 Guardian Premium Wi-Fi Connected... Coming in strongly at number three is the best basement sump pump with battery backup - WAYNE BGSP50 Guardian, a system known for its outstanding power and water draining capabilities. You have the option to power this WAYNE battery backup sump pump on AC power, direct from the wall socket.

What is the best water-powered backup sump pump?

The best water-powered backup sump pump by far is Water Commander(TM). Water Commander's ultra-performance model, model MG36, is able to pump faster than high-end battery backups and 2-3x more than any other water-powered backup.

How much water can a battery backup sump pump remove?

Most sump pump backup systems will remove an average of 1,800 to 2,000 GPH at a 10-foot lift, which means they can pump that much water to a height of 10 feet, which is the typical height necessary to remove water from below a basement to the ground level. Installing a battery backup sump pump isn't a difficult project.

**Battery and Runtime** The best sump pump battery backup runs on 12-volt, acid-free batteries. Some manufacturers recommend a battery that's marine rated, which means it will withstand moisture better than a standard 12-volt battery. A 12-volt battery's power can range from 40 to 80 amp hours or more, with 75 amp hours being the most common.
