What is gas insulated switchgear?

Gas-insulated switchgear combine vacuum switching technology with clean air insulation. It operates with Zero harmful greenhouse gases of any kind, with Zero toxic decomposition products and Zero safety requirements during handling and maintenance. Enabling higher voltage levels for wind turbines.

What is Siemens Energy switchgear?

For more than a century, the site has been a fountainhead of innovation in the development and manufacturing of equipment that helps supply the world with electricity. Jorra, the General Manager at the Siemens Energy Switchgear Plant Berlin, knows the site like the back of his hand.

How do switchgear and substation power systems work together?

Switchgear and substation power systems work together to deliver electric power and mitigate potential electrical faults downstream in the electrical generation process ensuring safe electrical power.

What is blue gas insulated switchgear (GIS)?

Read more here! Siemens Energy has been awarded the contract to deliver ten bays of Blue gas-insulated switchgear (GIS) to Fingrid, Finland's transmission system operator. It will be the first GIS in Finland that replaces F-gases with clean air, a pure mixture of nitrogen and oxygen with zero potential for global warming.

Why should you use blue switchgear?

This means eliminating F-gases from electrical switchgear - particularly SF<sub>6</sub>, a gas 24,300 times more climate-hostile than CO<sub>2</sub>. Our Blue portfolio uses clean air and vacuum switching technology instead. Zero F-gases, Zero toxicity and Zero harm to human health and the environment. Less global warming potential is not good enough.

Does switchgear still use SF<sub>6</sub>?

Most switchgear still uses SF<sub>6</sub> for insulation - a gas 24,300 times more climate-hostile than CO<sub>2</sub> and one which stays in the atmosphere for up to 3,200 years. Even the new F-gas alternatives are still harmful to the environment when released. That's not sustainable, as recognized by the new EU-F-gas-regulation.
