Does system 11 have a power supply?

The last system 11A pin (Big Guns) added an Aux Power Supply. Some 11B and 11C have an interconnect board as well as the Aux Power Supply board. There are other significant differences between the systems that will not be covered here. All pinball machines require certain voltages to be present in order to work and System 11 is no different.

What are the components of a system 11?

System 11 consists of four boards: CPU, power supply, flipper power, and a 'background' sound board- but the CPU houses the main sound components. 11A moves the sound amplification from the CPU board and has a full external sound board. The last system 11A pin (Big Guns) added an Aux Power Supply.

What is the difference between system 11 and system 11A?

There are distinctive differences between the systems that complicate troubleshooting. System 11 consists of four boards: CPU, power supply, flipper power, and a 'background' sound board - but the CPU houses the main sound components. 11A moves the sound amplification from the CPU board and has a full external sound board.

How do I connect a power supply to a Williams System 11B?

You can either screw your power directly to the board or use the supplied 4 pin connector. Note: Not all Williams System 11B machines use this power supply. Some also use the D-12246 or what we refer to as the Williams System 11C power supply. Note: Some Black Knights used the System 3-6 Style Power Supply.

Does system 11 have a flipper power supply?

Note that Williams was constantly making changes to system 11 and it didn't necessarily coincide with a change in designation from 11, 11A, 11B to 11C. For example, there is a separate flipper power supply in all system 11, and some 11A - but not all.

Do all Williams 11B machines use a d-12246 power supply?

Note: Not all Williams System 11B machines use this power supply. Some also use the D-12246 or what we refer to as the Williams System 11C power supply. Note: Some Black Knights used the System 3-6 Style Power Supply. If your power supply board is more square, then look at the System 3-6 Power Supply board.
