

Taylor lithium scale battery replacement

How do I replace the battery on my scale?

Stand on the scale for 10 seconds (still without the battery). Carefully replace the battery without pressing any buttons or activating the scale. Set the scale on the floor (no carpet) with the battery in place. Using only one foot, tap the scale or apply just enough pressure to turn on the display. IMMEDIATELY REMOVE YOUR FOOT.

How do I replace a battery on my CR2032 scale?

When the readings on the LCD screen of the scale grow dim or irregular, it is time to replace the battery. Use one 3 volt CR2032 lithium battery. Remove screw (or screws) from the battery compartment cover on the bottom of the scale and remove the cover. Remove the old battery from the compartment. Place the new battery with the "+" sign up into the battery compartment.

What kind of battery does a CR2032 scale use?

This scale operates on 1 - 3 volt CR2032 lithium battery (installed). There is a strip under the lithium battery cover to prevent battery drain in shipping. Please remove the strip before continuing with these instructions (you may need to remove the strip).
