What are MTU microgrid solutions?

mtu microgrid solutions range from stand-alone battery storage to fully integrated hybrid systems. Reduce your grid stability power demand by storing power and/or using gensets to lower demand charges which are typically based on the single highest grid stability power draw (in kW) per year.

What is a Rolls-Royce MTU microgrid?

Our full Rolls-Royce mtu microgrid solution is helping to deliver reliable, renewable power to the UK's logistics and supply chain industry.

Are microgrids the future of distributed power generation?

Microgrids are considered to be the future of distributed power generation. Haiti has had one in operation for many years - with suitable assistance from Rolls-Royce employees. Rolls-Royce is using mtu EnergetIQ to control its smart energy systems - all the way from simple emergency generator sets to complex microgrid set-ups.

Why is MTU diesel a good choice for microgrids?

Superior low load operation capability and excellent load acceptance makes mtu diesel systems a perfect fit for flexible operation within microgrids. Also, the best-in-class power density provides a high margin of safety in case backup power is called for.

Can intelligent microgrids Revolutionize Your Energy Solutions?

Unlock the secrets to revolutionizing your energy solutions with intelligent microgrids. In this case study, we take a close look at the challenges of grid capacity constraints and what this means for growing businesses. For energy intensive industries, managing energy costs is crucial for success.

Is a microgrid a good investment?

A microgrid designed to fit your business demands and local requirements can deliver a solid return on investment. Rolls-Royce provides world-class power solutions and complete lifecycle support under our product and solution brand mtu.

To future-proof the site and provide renewable, resilient power BasePower selected a Rolls-Royce mtu microgrid solution that includes three mtu CHP units, two mtu EnergyPack battery containers, two mtu emergency gensets and the ...

Rolls-Royce is supplying 31 mtu generator-sets and a microgrid-level control system to support emergency operations at a new, hyperscale data center in Japan. The data center went into operation near ...
