

# The first step of solar power installation

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A solar panel will be most effective if you have a south-facing roof.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Do solar panels need to be wired before installation?

Without fastening them at first, the installers will place the solar panels onto the mounting system. Once the correct angle is achieved, the panels are fastened with bolts. Your solar panel will most likely be pre-wired before installation, meaning that the wiring process can be skipped.

Are solar panels easy to install?

Installing solar panels is usually relatively quick and straightforward, but it's still worth getting to know all the ins and outs of how it happens. After all, considering how much solar panels cost, it makes sense to understand the process.

How long does it take to install solar panels?

“When you have decided that you would like solar panels fitted, a desktop survey and quote is done,” explains David. “This should not take more than about an hour or so to prepare. You may want to get two or three quotes from different installers to compare quotes and service.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.
