

The wind broke the wind turbine

Did GE Vernova break a wind turbine blade?

Link Copied! Giant wind turbine blades for the Vineyard Winds project are stacked on racks in New Bedford, Massachusetts. The massive offshore wind turbine blade that broke and spread fiberglass and foam debris across Nantucket beaches this week was one of several recent failures of blades made by GE Vernova - a top US wind turbine manufacturer.

Why did a wind turbine break apart off Nantucket Island?

(AP Photo/Charles Krupa, File) NANTUCKET, Mass. (AP) -- The maker of a massive wind turbine blade that broke apart off Nantucket Island and washed up on the beaches says a manufacturing problem was responsible.

What happened to a broken wind turbine?

Soon, a picture of the broken turbine itself surfaced. The 351-foot blade had snapped about 65 feet from the base and what remained of it hung slackly, dangling over the ocean. It was not a good look for an industry already struggling against economic headwinds and public concern about its impacts on the ocean environment.

Why did a blade from a vineyard wind turbine break into pieces?

It's unclear why a blade from one of the Vineyard Wind turbines broke into pieces, which are washing up on Nantucket beaches. Workers moved turbine blades for the Vineyard Wind offshore facility at the New Bedford Marine Commerce Terminal in Massachusetts last year. Bob O'Connor for The New York Times

Did wind turbine blade damage Nantucket Beach?

Bob O'Connor for The New York Times Debris from a damaged wind turbine blade has been washing up on the shores of Nantucket, Mass., prompting the closure of several beaches to swimmers and spurring an investigation into what caused the mishap.

What happened to Vineyard Wind turbine blade?

The massive turbine blade - as long as a football field - was part of the Vineyard Wind farm off the coast of Massachusetts and its islands, Martha's Vineyard and Nantucket. The blade was "broken" and "folded over" on Saturday, Vineyard Wind CEO Klaus Skouster told Nantucket residents and officials at a public meeting Wednesday night.

The cost of replacing a bearing can vary significantly, depending on the turbine model and the downtime involved, typically from a few thousand to tens of thousands of euros. ...

Now that we understand the wind turbine's components, let's break down the process of converting wind energy into electricity: 1. Capturing the Wind. When the wind blows, it strikes ...

The wind broke the wind turbine

NANTUCKET, Mass. (AP) -- The maker of a massive wind turbine blade that broke apart off Nantucket Island and washed up on the beaches says a manufacturing problem was responsible. GE Vernova CEO ...

UPDATE THURSDAY 9:05 a.m.: Ian Campbell of Vineyard Wind tells CAI that as of 8:00 a.m. the damaged blade was still hanging on. As of late Wednesday night part of a blade from an offshore Vineyard Wind turbine ...

These turbines have rotor blades just over 115m long. 5 When rotating at normal operational speeds, the blade tips of a 15MW wind turbine sweep through the air at approximately 230 mph! 6 To withstand the very high ...

This question has been answered in a paper published in 1919 by a German physicist Albert Betz who proved that the maximum fraction of the upstream kinetic energy K that can be "absorbed" by an ideal "actuator" - not ...

A Vineyard Wind turbine blade broke over the weekend, scattering debris into the Atlantic and prompting an investigation by the manufacturer and federal officials. The offshore wind energy company, which ...

The turbine blade incidents have been a setback for projects at a time when the U.S. and other governments are relying on wind power in the transition away from fossil fuels ...

Don't break wind turbines' hearts; they couldn't handle a power surge. 9. The wind turbine community is tightly knit; they really do whirl together. 10. It's hertz so good when wind turbines power up the dance floor. 11. Wind ...
