

# Training for migrant workers to install photovoltaic panels

Who can take the solar PV installation & maintenance course?

This course is intended for qualified electricians. Please read the entry requirements carefully before booking this course. This 5 day solar PV installation and maintenance course offers practical and theory in design installation and maintenance of Solar PV systems.

What qualifications do I need to install a solar photovoltaic system?

In order to fit solar photovoltaic (PV) technology, a recognised qualification is required in the UK. You should have the following qualifications: NVQ/SVQ Level 3 in Electrical Installations, 18th Edition, inspection & Testing, Level 3 Award In the Installation and Maintenance of Small Scale Solar Photovoltaic Systems.

What is a 3 day solar PV installation course?

Such a course is a requirement of the Minimum Technical Competency document for PV installers and is recognised by the MCS operators as evidence of suitable training. This 3 day course will enable candidates to select the most appropriate solar Photovoltaic system for a property to meet the client's needs and to commission and handover the system.

What is a bpec solar PV installer qualification?

This 4 & 1/2 day BPEC Solar PV Installer qualification is for those wishing to achieve a nationally recognised qualification in the installation and maintenance of small scale grid tied Photovoltaic systems. It is based on the National Occupational Standards and is recognised and accepted by the Microgeneration Certification Scheme.

What is a solar photovoltaic installer course?

The solar photovoltaic installer course delivers the knowledge, skills and competency required to design, install, commission and maintain domestic and commercial solar PV systems. During the course, you will receive practical training, including work on:

How long does a solar PV installation course take?

Our Solar PV Installation Course with battery storage is completed over 5 days. This qualification is specifically designed to equip individuals with the skills and knowledge they need to install, commission, fault find and maintain photovoltaic systems to the highest standards, in line with industry regulations and accepted codes of practice.

This 4 day qualification in Solar Photovoltaic (PV) provides an understanding of PV systems with a view to applying for Competent Persons, Micro-Generation Scheme and/or Green Deal registration. The course is designed in ...
