

True solar power

What is true solar power?

True Solar Power. Thanks to our revolutionary solar concentrator design, TCT RED achieves a much lower payback period, compared to other current solar thermal energy systems. With our solar guidance system, we achieve maximum yield on the sun's energy by using mirrors fixed on a focal point.

Who is true solar solutions?

We at True Solar Solutions are dedicated to our clients and their needs, as well as the Non-Profit Organization Superhero Cancer Kids. We are on an amazing journey - both humbling and exciting - to bring sustainable, renewable, affordable, off-grid solar energy into both residential & commercial industries in the South African market.

Who is true solar?

True Solar's unique approach extends beyond serving homeowners directly; it is also the backbone for installations of five other solar companies in Iowa that rely on subcontractors.

Is true solar a good company?

True Solar boasts the combined equivalent experience of over 10,000 residential installations, with no team member holding less than 2 years of experience in what is still a very new industry. That wisdom will bode well when competing against national corporations with significant company experience, but minimal local staff experience.

Who is True Value Solar?

True Value Solar Pty Ltd is a limited by shares, Australian proprietary company. This corporation was registered on 2010-04-20 and was issued with the 143232482 ACN. Its Australian Business Number is 11143232482. Since 2014-09-20, the company is headquartered in VIC, post code 3133.

Does solar work if it's raining?

Here are some common myths and misconceptions: Myth #1: Solar only works when the sun is shining. I still need power when it's raining. Actually, solar technology can be leveraged in virtually any condition, including rainy and snowy days, because some sunlight still reaches the earth.

Is one solar panel enough to power a house? One solar panel is not enough to power a house. Home solar systems typically feature 10-20 panels to produce enough power to offset 100% of the average household electricity consumption.
