How do I install solar panels on a ground structure?

Mount your solar panels on the ground structure. Connect your solar panels to your inverter. Maintain your ground-mounted solar panels. For our scenario, we consider the following: System size: A 2.4kW solar system of 6 x 400W solar panels. Total installation time: 2 to 3 days, including the building of the ground structure and solar frame.

How do I maintain my ground-mounted solar panels?

Maintain your ground-mounted solar panels. For our scenario, we consider the following: System size: A 2.4kW solar system of 6 x 400W solar panels. Total installation time: 2 to 3 days, including the building of the ground structure and solar frame. -- Choose the sunniest spot (full sun). -- Facing south (in Northern Hemisphere).

Are ground-mounted solar panels a good idea?

Ground-mounted solar panels are great for properties with a large amount of land or a roof that's unsuitable for solar panels. If your property has a lot of outdoor space, it could fit a larger solar panel system on the ground than on the roof, generating more electricity.

How to install solar panels?

1. Screw the L-shape mounting brackets on top of your frame. Make sure they are perfectly aligned.
2. Slide the aluminum rails in the mounting brackets and tighten them with a screwdriver. Your frame should look like this: Time to put the solar panels in place!

Can solar panels be installed in a garden?

If a property has less than 30 square metres of land, ground-mounted solar panels can still be fitted in a garden, either to supplement the solar panels on the roof of the house, or to power sheds or garden lights. Read more about Solar Panels for Garden on our page, or check out our pages on Solar Panel.

Are bifacial solar panels better than ground-mounted solar panels?

Ground-mounted solar panels are more efficient than roof-mounted solar panels, as achieving the best angle and direction is easier when no roof is in the way. This setup also enables the installation of bifacial solar panels, which can turn more sunlight into power.
