

Upc backup

What is a backup battery power supply?

Backup battery power supply is designed for use during outages and unsafe voltage fluctuations, and provides surge protector with battery backup in the event of damaging power surges and spikes.

What is APC back-ups pro?

The APC Back-UPS PRO series of Uninterruptible Power Supply are the perfect battery backup for computer, external hard drive and routers to protect your data and keep you connected. This APC 1500VA UPS offers AVR, is active PFC compatible, and has a User-replaceable battery to prolong the life of your UPS by APC.

What is an APC battery back up power supply?

This APC battery back up power supply offers guaranteed power and surge protection for wireless networks, computers, and other electronics in your home or business.

Which APC battery backup is best?

The APC BR1500G is an excellent battery backup with AVR and surge protection. It allows for easy cell replacement and the ability to add external backups. If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you.

Why do I need a battery backup?

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.

Why should you buy a UPS battery backup?

Whether that's a blackout, brownout, or power surge, the best UPS battery backup will give you the time to save what you're doing and turn off your machine safely. Power surges and interruptions can be bad news for PC components, so what you're buying is peace of mind more than anything else.
