

The new generation of battery technology is central to China's success in building electric cars that are considerably cheaper than electric and gasoline-powered cars made in other countries.

Google plans to support multiple commercial projects worldwide to deploy Energy Dome's CO2 Battery technology, which can store excess clean energy and dispatch it back to the grid for 8 ...

New two-hour big battery soaking up rooftop solar in Brisbane suburbs completes testing process Issuance of 80th Anniversary of Liberation Commemorative Coins (Ministry of Trade, Industry ...

Apart from proposing to tighten export restrictions on battery cathode material preparative technology, China plans to enhance export curbs on specific technologies and processes used for extracting metallic gallium and lithium, ...

Integrated battery technologies encompass both battery pack and body integration methods, with Cell to Pack (CTP) and Cell to Body (CTB)/Cell to Chassis (CTC) being prominent forms. With...

Restrictions are being applied to three technologies used to make intermediate substances needed for battery cathodes -- including those used to produce lithium iron phosphate (LFP), ...

The International Energy Agency (IEA) recently released a report highlighting significant shifts in the electric vehicle (EV) battery market, including falling battery prices, the rising adoption of ...

Tesla is finalizing its first North American LFP battery cell factory in Sparks, Nevada, marking a shift from Chinese imports. The plant will boost production, cut costs, qualify for U.S. tax ...

****Discover the latest advancements in power battery technology**** with the Integrated Battery & Innovation Technology Report 2025. This comprehensive report highlights 17 vehicle models ...

Italtel is Italy's first large-scale battery manufacturer, launching a 45 GWh facility in Scarmagno by 2025. Specializing in NMC lithium-ion cells for EVs and energy storage, it utilizes XFC and solid-state technologies, supporting sustainable ...

China has imposed export restrictions on eight key EV battery technologies as the country seeks to consolidate its dominance in the global EV race. The move makes it harder for Chinese ...

China has put export restrictions on technologies critical for producing electric vehicle batteries, in a move to consolidate its dominance in the sector that has contributed to the country's ...
