

# What to do if the photovoltaic panel surface leaks

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Can solar panels cause leaks?

The weight of the solar panels can cause stress on the roof, especially if the roof is already weakened or damaged. If the solar panels are not installed at the correct angle, water can pool on top of them and potentially cause leaks. In this article, we will share ways to reduce the risk of leaks, both before and after a solar panel installation.

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

How do I know if my solar panel is leaking?

Detecting a roof leak under solar panels may not always be straightforward, but there are several signs that can indicate a problem. Keep an eye out for the following signs: Water stains or discoloration: Look for water stains on the ceiling or walls near the solar panel installation. These stains may appear as dark spots or patches.

What should I do if my solar panels are damaged?

Regularly inspect your solar panels for damage. Keep tree and bush branches away from your solar panels. Doing so may mean pruning trees and bushes or removing them if they become too large. Regularly clean your panels or have a professional service perform the task. Have regular professional whole-system inspections.

How do you reinstall solar panels after roof repairs?

Reinstall the solar panels: After the roof repairs have been completed, carefully reinstall the solar panels following the manufacturer's instructions or seek professional assistance. Ensure that all electrical connections are properly reconnected and tested before turning the solar panel system back on.

The top reasons for the leak are mainly roof-based ranging from old roof condition, incompatible roof type, prior roof damage, improperly installed vents and others that have nothing to do with the solar panel itself. Let's discuss the ...
