

Why are solar energy stocks down

Why are investors selling solar stocks?

Why are investors selling solar (and hydrogen) stocks? The reasons renewable energy investors are frightened take multiple forms. Sunnova for example could be a huge loser if new Trump tariffs against solar panels imported from China take hold and strangle its supplies.

Are solar stocks gyrated based on rate changes?

Solar stocks in particular have gyrated based on rate changes all year, and this week, higher rates meant lower stock prices. A downgrade of NextEra Energy Partners by Seaport Global to sell with a \$15.50 price target was a big shock to the market.

Is SolarEdge stock down again?

The shares proceeded to fall further in the day's opening minutes, before turning around, gaining back (almost) all their losses -- then retreating again. As of 11:15 a.m. ET, SolarEdge stock is down again, but only by 3.3%. At the same time, other companies in the solar industry are making big moves of their own.

Should you buy solar energy stocks?

Volatility has become the norm for solar energy stocks, but don't let that be the reason to avoid the industry. This is still a growing industry, and energy needs will only increase in the future. Short-term volatility can be a buying opportunity, and I think we are reaching lows that make these attractive stocks for investors.

How will administration changes affect the solar energy industry?

Administration changes often bring changes to the renewable energy industry, but the direct impact is often unlike what investors expect. Over the last four years, multiple positive policies were passed, but many solar energy stocks struggled and some companies even went bankrupt.

How will higher interest rates affect the solar industry?

Higher interest rates hurt the cost structure of the solar industry. Installers cut back on orders as demand plunged for installations late in the year. Despite negative trends, demand is still growing long term, and rising utility rates should make the industry more competitive.

Either way, don't be surprised by volatility in solar energy stocks, which have had a great year on the stock market, despite today's dip. Travis Hoium has no position in any of the stocks mentioned.
