

Wind turbine generator qualification query

What qualifications do I need to become a wind turbine operator?

You will attend our North Wales training center, where you will complete your academic qualifications: 1. NVQ level 3 in wind turbine operations and maintenance + 2. Level 3 diploma in wind turbine maintenance
What existing attributes do you need? 5 GCSE's (or equivalent) at 4/C or above including Science, Maths and English.

How many units are in the wind turbine qualification?

This qualification is composed of 10 units. Marine Safety and Sea Survival in the Wind Turbine Environment
Working with Mechanical Systems in the Wind Turbine Environment
Working with Electrical Systems in the Wind Turbine Environment
Working with Hydraulic Systems in the Wind Turbine Environment

How can I get a job with a wind turbine engineering degree?

It might give you an advantage if your course includes the opportunity to get work experience through summer internships or a year in industry. You could do a college course, which could help you to get a trainee job with a wind turbine engineering company. You could apply to do an Engineering Technician Level 3 Advanced Apprenticeship.

Can I apply for a wind turbine course if I don't have qualifications?

If you don't have formal qualifications but have life experience, then we'll also consider you for a place, so please do apply. Explore the world of wind turbine technology and engineering with our course. Here's a glimpse of what you may look at on the course: study components, functions, and operations of wind turbines.

What certifications do wind turbine technicians need?

Professional certifications and ongoing learning are vital for wind turbine technicians. Securing industry-recognized certifications, like GWO Basic Safety Training, is crucial. These certifications demonstrate a technician's proficiency and adherence to global safety standards. The wind energy field is constantly evolving.

What is a wind turbine technician course?

The course offers a comprehensive and well-supported learning programme, with a blend of classroom-based learning and time on site working with our technicians. Our Wind Turbine Technicians work in teams dedicated to specific offshore wind farms.

The terms "wind energy" and "wind power" both describe the process by which the wind is used to generate mechanical power or electricity. This mechanical power can be used for specific ...
