

Xinyi Solar Power Generation Home Equipment

What is Xinyi Solar?

Xinyi Solar Holdings Limited is one of the world's leading photovoltaic glass manufacturers and specializes in research and development, manufacturing, sales, and after-sales services of photovoltaic glass.

How did Xinyi Solar start?

The first utility-scale ground-mounted solar farm successfully connected to the grid. The first overseas production base commenced production in Malaysia. Xinyi Energy was spun off and listed on the Hong Kong Stock Exchange. Xinyi Silicon was formed and Xinyi Solar was included in Hang Seng Index.

Why has Xinyi pushed back solar projects?

While Xinyi said some solar projects had been pushed back into this year so developers could assess energy storage requirements mandated by the authorities, the company said it constructed four solar farms with a total generation capacity of 440MW last year and bought two projects to add a further 140MW to its portfolio.

What is Xinyi Fujian Nanping Songxi photovoltaic project?

The total investment of the project is about 620 million yuan, with an installed capacity of 70MW and an annual power generation of 93.25million kWh, which could save 28,000 tonnes of standard coal every year. Xinyi Fujian Nanping Songxi Photovoltaic Project has an installed capacity of 30MW.

What does Xinyi PV stand for?

The Hong Kong-based solar glass maker's unit Xinyi PV Products (Anhui) Holdings Ltd has entered into the agreement with a local government authority on January 24. It will install most of the distributed generation (DG) systems at individual households by the end of the year, the parent explained without disclosing their planned capacity.

What is Xinyi Xiejiaji project?

The Xinyi Xiejiaji project is the world's first large-scale floating solar farm, which was connected to the grid in March 2016. The total investment of the project is about 620 million yuan, with an installed capacity of 70MW and an annual power generation of 93.25million kWh, which could save 28,000 tonnes of standard coal every year.

The solar farms adopt a power generation mode of "self-generated and self-consumption, and the surplus power is connected to the grid", with an annual power generation of 7.91 million kWh, saving 11.5% of the station's electricity ...

The company specializes in the photovoltaic glass production and solar farm development and construction. Major products include ultra-clear patterned solar glass (raw and tempered), anti-reflective coating glass and
